

## TO WHOM IT MAY CONCERN

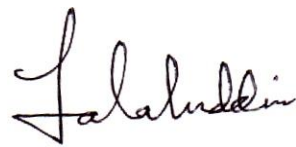

---

This reference letter is provided at the request of Md. Keiuom Miah. He participated in our company's internship program under my supervision. He worked for the Dev Skill developer team as an intern from 19<sup>th</sup> May, 2021 to 19<sup>th</sup> July, 2021 (2 months).

**Dev Skill** is an ITES company. We focus on software development, IT training and consultation to different software companies.

As part of the **Dev Skill** developer team, Md. Keiuom Miah performed really well and he was one of the best performers from the current internship group. He was able to pick up the workflow methodology easily and followed that methodology quickly. He understood the requirements properly and whenever he was in confusion, he was sure to ask us to clear it for him. This is something that I highly praise, because as beginners, they are often confused and start working without proper planning and understanding the requirements.

I have tried to give an overview of his performance during the internship period in our company. I would highly recommend him to any future employer.

**Md. Jalal Uddin**

CEO

**Dev Skill**
